Cephalalgia is included in the ADONIS service. Accordingly, copies of individual articles are available on compact discs (CD-ROM) and can be printed out on demand. An explanatory leaflet is available from the publisher.

PROGRAMME *Cephalalgia* is published bimonthly and contains original papers on all aspects of headache. The journal provides an international forum for original research papers, review articles, and short communications. Hypotheses may also be published. Supplements are supplied free of charge to the subscribers and copies can be purchased on application to the publisher.

Contributions appearing in this journal are abstracted and indexed in *Biological Abstracts*, *Chemical Abstracts* (1981–1983), *Current Awareness in Biological Sciences* (CABS), *Current Contents/Clinical Medicine*, *Excerpta Medica*, *Index Medicus* (1981–), *National Epilepsy Library and Resource Center*, *Neuroepidemiology*, *The Nuclear Medicine Literature*.

MANUSCRIPT ADDRESSES Contributors are requested to send four copies of their manuscripts to: Editor-in-chief of *Cephalalgia*, K. M. A. Welch, Henry Ford Hospital and Health Science Center, Department of Neurology, 2799 W. Grand Blvd., Detroit, MI 48202, USA. Book Review manuscripts should be sent to Anne MacGregor, City of London Migraine Clinic, 22 Charterhouse Square, London EC1M 6DX, UK.

BUSINESS ADDRESS Communications regarding accepted manuscripts, proofs, orders for offprints, advertising, subscriptions, etc. should be sent to the publisher, Scandinavian University Press, P.O. Box 2959 Tøyen, 0608 Oslo 6, Norway. Tel +47 22 57 54 00, Fax +47 22 57 53 53. American Office: Cephalalgia, Publications Expediting Inc., 200 Meacham Avenue, Elmont, NY 11003, USA.

SUBSCRIPTION PRICE One volume (six issues)—Institutions USD 220.00. IHS members USD 80.00. Nordic countries: Institutions NOK 1100.00. IHS members NOK 440.00. Airmailed to subscribers worldwide. In Japan, all subscriptions should be ordered through the Maruzen Co. Ltd., 3–10 Nihonbashi 2-Chome, Chuo-ku, Tokyo 103, Japan. This journal can be ordered in microform from University Microfilms International, 300 N. Zeeb Rd., Dept. P.R., Ann Arbor, MI 48106, USA.

Cephalalgia (ISSN 0333-1024) is published bimonthly by Scandinavian University Press, P.O. Box 2959 Tøyen, 0608 Oslo 6, Norway. Second-class postage paid at Jamaica, NY 11431, USA. Postmasters: Send address changes to *Cephalalgia*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, NY 11003. Air freight and mailing in the USA by Publications Expediting Inc.

Author index

- Abbritti G
Red blood cell magnesium levels in migraine patients, 94
- Abu-Arafeh IA
Current controversies—abdominal migraine (Letter to the Editor), 138
- Alecci M
Increased platelet serotonin content and hypersecretion from dense and α -granules in vitro in tension-type headache, 349
- Al-Qassab HK
Comparison of propranolol LA 80 mg and propranolol LA 160 mg in migraine prophylaxis: a placebo-controlled study, 128
- Anastácio de Macedo TDR
Changes in platelet membrane fluidity of migraine patients, 99
- Anselmi B
Amplifying effect of sumatriptan on noradrenaline vasoconstriction in migraine patients, 378
- Arendt-Nielsen L
Exteroceptive suppression periods in jaw-closing muscles. Variability and relation to experimental pain and sustained muscle contraction, 184
- Argiro G
l-Deprenyl test in migraine: neuroendocrinological aspects, 406
- Aromaa M
Prevalence of frequent headache in young Finnish adults starting a family, 330
- Arrigo A
The nociceptive flexion reflex as a tool for exploring pain control systems in headache and other pain syndromes, 21
- Arrowsmith F
A double-blind placebo-controlled trial of intranasal capsaicin for cluster headache, 114
- Assenza S
Basilar migraine with electroencephalographic findings of occipital spike-wave complexes: a long-term study in seven children, 192
- Atzei GP
l-Deprenyl test in migraine: neuroendocrinological aspects, 406
- Bakken IJ
Sumatriptan relaxes isolated porcine ophthalmic artery, but inhibits VIP-induced relaxation, 378
- Bancroft K
Domperidone plus paracetamol in the treatment of migraine, 124
- Bendtsen L
Exteroceptive suppression periods in jaw-closing muscles. Variability and relation to experimental pain and sustained muscle contraction, 184
- Berciano J
Relief of cluster-tic syndrome by the combination of lithium and carbamazepine, 205
- Bernardi G
l-Deprenyl test in migraine: neuroendocrinological aspects, 406
- Besken E
Contingent negative variation in childhood migraine, 42
- Björkman R
Diclofenac-K (50 and 100 mg) and placebo in the acute treatment of migraine, 117
- Blau JN
What some patients can eat during migraine attacks: therapeutic and conceptual implications, 293
- Bono G
The nociceptive flexion reflex as a tool for exploring pain control systems in headache and other pain syndromes, 21
- Brennum J
Exteroceptive suppression periods in jaw-closing muscles. Variability and relation to experimental pain and sustained muscle contraction, 184
- Brinck TA
Arterial supersensitivity to nitric oxide (nitroglycerin) in migraine sufferers, 395
Headache resembling tension-type headache as the single manifestation of Lyme neuroborreliosis, 207
- Brown S-L
Headache and cortisol responses to m-chlorophenylpiperazine are highly correlated, 400
- Brusa L
Basilar migraine with electroencephalographic findings of occipital spike-wave complexes: a long-term study in seven children, 192
- Bullock R
Problem drinkers do not get headache (Letter to the Editor), 365
- Bussone G
Effect of biofeedback treatment on sympathetic function in common migraine and tension-type headache, 197
Post-endarterectomy headache (Letter to the Editor), 219
A review of hormonal findings in cluster headache. Evidence for hypothalamic involvement, 309
Beta-endorphin levels are reduced in peripheral blood mononuclear cells of cluster headache patients, 413
- Buzzi MG
Spreading depression and CGRP, 149
Sumatriptan and membrane potential, 149
Basilar migraine with electroencephalographic findings of occipital spike-wave complexes: a long-term study in seven children, 192
Sumatriptan relaxes isolated porcine ophthalmic artery, 375
- Caekebeke JFV
Transient resolution of headache in giant cell temporal arteritis after sumatriptan, 426
- Calabresi P
l-Deprenyl test in migraine: neuroendocrinological aspects, 406
- Carelli V
Testing models for genetic determination in migraine, 389
- Castillo J
Neuroexcitatory amino acid levels in plasma and cerebrospinal fluid during migraine attacks, 89

- Platelet-rich plasma serotonin levels in tension-type headache and depression, 346
- Catarci T
Cellular adaptation in migraineurs with chronic daily headache, 261
5HT in migraine patients with medication-induced headache, 410
- Cerbo R
Basilar migraine with electroencephalographic findings of occipital spike-wave complexes: a long-term study in seven children, 192
- Chopp M
Arterial supersensitivity, 375
- Cerquiglini A
Computerized EEG topography in childhood migraine between and during attacks, 53
- Connor HE
Extracellular recordings of membrane potential from guinea-pig isolated trigeminal ganglion: lack of effect of sumatriptan, 175
- Corbett JJ
The forgotten lumbar puncture, 212
- Cortelli P
Autonomic function in migraine (Letter to the Editor), 298
Testing models for genetic determination in migraine, 389
- Cotrim MD
Changes in platelet membrane fluidity of migraine patients, 99
- Crisci M
Testing models for genetic determination in migraine, 389
- Cupini LM
l-Deprenyl test in migraine: neuroendocrinological aspects, 406
- Curradi C
Amplifying effect of sumatriptan on noradrenaline vasoconstriction in migraine patients, 378
- D'Amico D
Beta-endorphin levels are reduced in peripheral blood mononuclear cells of cluster headache patients, 413
- D'Andrea G
Increased platelet serotonin content and hypersecretion from dense and α -granules in vitro in tension-type headache, 349
Magnesium and glutamate, 73
- Dahlöf C
Diclofenac-K (50 and 100 mg) and placebo in the acute treatment of migraine, 117
Placebo-controlled clinical trials with ergotamine in the acute treatment of migraine, 166
Assessment of health-related quality of life in migraine, 233
- Dartigues JF
Migraine epidemiology (Letter to the Editor), 216
- de Belleruche J
Cellular adaptation in migraineurs with chronic daily headache, 261
- De Marinis M
Post-endarterectomy headache (Letter to the Editor), 218
- de Romanis F
Basilar migraine with electroencephalographic findings of occipital spike-wave complexes: a long-term study in seven children, 192
- Dieterich M
Cervicogenic headache: electronystagmography, perception of verticality and posturography in patients before and after C2-blockade, 285
- Drummond PD
Painful stimulation of the forehead increases photophobia in migraine sufferers, 321
Mechanisms of increased sensitivity to noise and light in migraine headache, 417
Visual function impairment in migraine: cerebral versus retinal deficit (Letter to the Editor), 432
- Dworschak M
Exteroceptive suppression of temporalis muscle activity: perspectives in headache and pain research, 15
- Edmeads J
Cervical headache, 232
- Edvinsson L
Cortical spreading depression does not result in the release of calcitonin gene-related peptide into the external jugular vein of the cat: relevance to human migraine, 180
- Eide PK
The role of 5-hydroxytryptamine (5-HT) receptor subtypes and plasticity in the 5-HT systems in the regulation of nociceptive sensitivity, 75
- Ekbom K
A gonadotropin-releasing hormone analog in chronic cluster headache, 231
- Ekman R
Cortical spreading depression does not result in the release of calcitonin gene-related peptide into the external jugular vein of the cat: relevance to human migraine, 180
- Facchinetti F
The association of menstrual migraine with the premenstrual syndrome, 422
- Fanciullacci M
Intranasal capsaicin administration, 73
